## SEP2-3.3

**SEMI ELECTRIC AERIAL ORDER PICKER**

**MODEL: SEAP-SEP2-3.3**

**APPLICATION** Storage | Commercial| Indoor | Inventory

## PRODUCT INFORMATION

EV PROTEC semi electric aerial order picker with electric lifting and manual pushing type operation. It is a portable lifting platform with complete protection of the barriers, allowing operators to stand on the lifting and descending platform safely. The platform is large enough for a single worker and small package of cargo.

## MAIN FEATURES

### - Emergency Stopping Button

When the electric order picker runs into an emergency, the operator can cut off the power system and stop the order picker.

### - Charging Indicator

Operator will know the status of battery capacity by the indicator color. This enhances the equipment working efficiency.

### - Dual Brake and Dual Brake Disc

One brake is used as a stopping brake and the other is a service brake which improves the driving safety.

### - Over Weight Limit

The order picker has a certain weight limit system so that it can effectively avoid accidents caused by being overweight.

### - Emergency Descending button

When there is an emergency, the operator simply needs to press the corresponding button in order to lower the order picker.
