

# EV Wall Charger 22KW 32A TYPE 2

**EV WALL CHARGER**

**MODEL: WCHRG-22KT2-2461**

**APPLICATION** DOMESTIC|COMMERCIAL

## **PRODUCT INFORMATION**

The **EV Wall Charger 22KW 32A Type 2** refers to an electric vehicle (EV) charging station that has the following key features:

1. **22kW Power Output:** This charger provides a maximum power output of 22 kilowatts, which allows for faster charging compared to lower power chargers. It can charge electric vehicles with higher capacity batteries more quickly.
2. **32A Current:** The charger is designed to supply up to 32 amps of electrical current, which is suitable for Level 2 home charging. This is typically used for faster charging at home or in commercial locations.
3. **Type 2 Connector:** The Type 2 connector is a standard used in Europe and many other parts of the world for electric vehicle charging. It's commonly found on modern EVs, and it's capable of both single-phase and three-phase charging.

This kind of charger is ideal for homes, workplaces, or commercial environments, offering a balance of speed and efficiency. However, you would need to ensure your electrical system supports the 32A load and that it's professionally installed by a certified electrician.

## **SPECIFICATION TABLE**

| DESCRIPTION        | VALUE                                |
|--------------------|--------------------------------------|
| Output Power       | 22kW                                 |
| Input Voltage      | 200 - 230v                           |
| Application        | AC Home Charging                     |
| Rated Current      | 32A                                  |
| Cable length       | 5 Meters                             |
| Rated Output Power | 22KW                                 |
| Charging Gun       | Type 2                               |
| Protection         | IP55                                 |
| Transport Package  | Standard Export Carton Box           |
| Startup mode       | Plug and charge, Smart card to start |
| Warranty           | 01 Year                              |
| Brand              | EV PROTEC UK                         |
