EV Wall Charger GB/T 7KW

EV WALL CHARGER

MODEL: WCHRG-7KWGB-2455

APPLICATION DOMESTIC|COMMERCIAL

PRODUCT INFORMATION

This 7kW EV Charging Station is an electric vehicle charger designed for home or commercial use. It typically offers a charging capacity of 7 kilowatts, allowing for relatively fast charging of electric vehicles, depending on the vehicle's battery capacity and charging capabilities.

Key features:

1. **Type of Connector:** It usually supports standard connectors like GB/T, compatible with many chinese spec EVs.
2. **Safety Features:** Built-in safety mechanisms to prevent overheating, overcharging, and electrical faults.
3. **User-Friendly Interface:** Many have simple interfaces for easy operation

SPECIFICATION TABLE

DESCRIPTION	VALUE
Output Current	AC
Output Power	7kW
Input Voltage	200 - 220v
Application	AC Home Charging
Rated Current	16A / 32A
Cable length	5 Meters
Rated Output Power	3.5KW 7KW
Charging Gun	GB/T
Protection	IP65
Transport Package	Standard Export Carton Box
Warranty	01 Year
Brand	BYD
