EV Protec **ULTIMA** - PPF(8.5Mils)

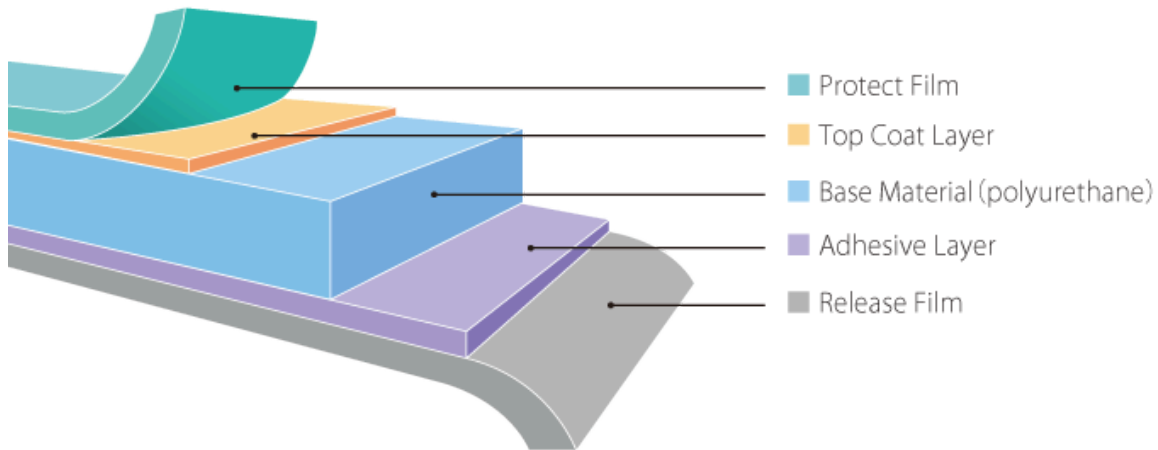

DESCRIPTION

EV Protec Ultima PPF is a high-end TPU-based Paint Protection Film with a 8.5Mils thickness and have a Self-Healing Layer that can be applied to painted parts of vehicles to protect the paint from scratches, stone impacts, water marks, UV rays, acid rain, bird droppings, etc. It provides a permanent protective coat over your car' paint, which helps you keep your car looking new and shiny for a longer period of time. When exposed to heat, the PPF's multiple layers work cohesively to shield a vehicle's paint and "heal" surface-level damage.
